### SOFTWARES:

|                  |            |
|------------------|------------|
| Autocad          | ██████████ |
| Sketchup         | ██████████ |
| D5 Rendering     | ██████████ |
| Photoshop        | ██████████ |
| Revit            | ██████████ |
| Microsoft Office | ██████████ |

### EDUCATION:

**UNIVERSITY OF MORATUWA**  
**2024 - 2026**

Bachelor of Architecture (Hons), Level 3

**MALIYADEVA BALIKA VIDAYALAYA**  
**2022 Advanced Level**

- OL - 9As
- AL - Physical Science  
Physics- A  
Combined Maths- A  
Chemistry-C

### INTERESTS:

- Architectural 3D modelling and visualisation
- Experimenting with architectural forms and structural systems
- Exploring different material systems
- Exploring light, shadow, and spatial atmosphere

### PROFILE:

An architecture undergraduate with an experimental, concept-driven and research-led approach to design interested in expressive forms, thoughtful circulation, and connections to nature exploring how structure, light, and changes in scale can shape spatial experience while paying attention to details.

### PROJECTS:

#### MAJOR DESIGN PROJECT I LEVEL 3

**Museum of Science and Technology**  
**Museum of Pure Air, Kandy** **I Grade - A-**

Exploring Architectural solutions to air quality degradation in Kandy using science and technology  
Raising awareness among the general public about rising environmental issues through architecture

#### PROCESS BUILDING I LEVEL 2

**Fabric printing Factory, Wellawatta** **I Grade - A**

Focused on harvesting daylight through the roof structure and energy-efficient building in an industrial building

#### HOUSE PROJECT I LEVEL 2

**Siriwardena House, Maharagama** **I Grade - B**

House design for an extended family of a retired author, using shared spaces to strengthen family bonds and encourage interaction across generations

#### MAJOR PROJECT I LEVEL 1

**Arena for Drama Therapy, Mannar** **I Grade - A+**

Community project to reduce alcoholism in the fishing community and improve social well-being through healing architecture using a dismantable structure made of recycled boat fibre
